

ALEXCO

Alexco Resource Corp. (the Company) is a Canadian corporation with corporate headquarters in Vancouver, British Columbia, Canada. Alexco operates two distinctive yet complimentary businesses; mine exploration, development and operations and environmental consulting and remediation services.

Alexco Resource Corp.'s business is to unlock value and manage risk at mature, closed or abandoned minesites through deployment of the company's core competencies and skills which include management of environmental services, execution of mine reclamation and closure operations and where appropriate, rejuvenation of exploration and development activity. The company's core asset is the Keno Hill Silver District, Yukon. The Keno Hill district is the second-largest historical silver producer in Canada and the historical production grades would rank Keno Hill in the top 3% by grade of today's global silver producers.

The Government of Yukon has recently issued a Quartz Mining Licence for the Bellekeno mine, being the primary permit authorizing Alexco to immediately commence mine development and mill construction at the site, located within the Keno Hill Silver District, Yukon. To take part in the start up, development and operation of the Bellekeno Mine and revitalization of the historic high grade Keno Hill Silver District, Alexco has an immediate opportunity for one:

SAFETY COORDINATOR

Reporting to the General Manager, the successful candidate will be responsible for:

- Developing safety training strategies & courses for the construction and operational phases of the project.
- Collecting, analyzing and reporting data relating to the implementation of preventative strategies, critical incidents and injury frequency rates.
- Developing and promoting strategies for enforcing safety standards and regulations across the district.
- Safeguard the construction and operating sites through safety measures that protect company assets & people.
- Managing emergency preparedness programs that ensure the site is able to react systematically and effectively in a crisis and minimize damage or risk.
- Included in Mine preparedness is the ability to train and participate as an active member of Mine, Surface Rescue and firefighting.
- Ability to write, communicate, implement and follow through with safety procedure and policies.
- Liaison with YTWCB and territorial agencies.

The candidate will have a university degree in a safety related discipline and or certified safety professional. A professional designation or certification in a safety related area, an Advanced First Aid certificate and a Mine Rescue certificate are required. Three to five years of safety and training management experience in an underground mining environment is required as well as a minimum of one to two years experience in a supervisory role.

Alexco maintains camp facilities in Elsa, Yukon, where employees and contractors are housed. This position is based in Elsa and the rotation schedule is 14 days on and 14 days off. Alexco provides full benefits packages comparable to current industry standards.
