

ALEXCO

Alexco Resource Corp. (the Company) is a Canadian corporation with corporate headquarters in Vancouver, British Columbia, Canada. Alexco operates two distinctive yet complimentary businesses; mine exploration, development and operations and environmental consulting and remediation services.

Alexco Resource Corp.'s business is to unlock value and manage risk at mature, closed or abandoned minesites through deployment of the company's core competencies and skills which include management of environmental services, execution of mine reclamation and closure operations and where appropriate, rejuvenation of exploration and development activity. The company's core asset is the Keno Hill Silver District, Yukon. The Keno Hill district is the second-largest historical silver producer in Canada and the historical production grades would rank Keno Hill in the top 3% by grade of today's global silver producers.

The Government of Yukon has recently issued a Quartz Mining Licence for the Bellekeno mine, being the primary permit authorizing Alexco to immediately commence mine development and mill construction at the site, located within the Keno Hill Silver District, Yukon. To take part in the start up, development and operation of the Bellekeno Mine and revitalization of the historic high grade Keno Hill Silver District, Alexco has an immediate opportunity for one:

MILL MANAGER

Reporting to the General Manager, the Mill Manager will oversee the effective milling of ore and will direct and manage all mill activities including planning, budgeting, staffing, cost containment, and profitability. The Mill Manager will also analyze milling information and provide direction in the development of mill plans. The Mill Manager will work with the senior management team in determining the overall strategy for the mill. Specific responsibilities include:

- Overseeing and implementing mill production programs and operations, including the assay lab, to maximize production efficiency and resources.
- Setting mill production budget using information from the overall mine budget and business plan targets.
- Keeping up to date with mining laws and safety regulations, and issuing directives to direct reports to ensure adherence to applicable rules and regulations.
- Providing top-level support and advice to the management team.
- Building an appropriate team through recruitment and development.
- Providing clear work objectives and expectations of the performance levels required to achieve business plans and production targets.

The candidate will have a university degree in Mineral Processing, Chemical Engineering, or related degree and a professional designation or certification in a related area. . The candidate will also have a minimum of twelve years of mill related experience with an emphasis on Ag-Pb and Zn flotation and at least 8-10 years of experience at a supervisory level.

Alexco maintains camp facilities in Elsa, Yukon, where employees and contractors are housed. This position is based in Elsa and the rotation schedule is 15 days on and 13 days off. Alexco provides full benefits packages comparable to current industry standards.
