

ALEXCO

Alexco Resource Corp. (the Company) is a Canadian corporation with corporate headquarters in Vancouver, British Columbia, Canada. Alexco operates two distinctive yet complimentary businesses; mine exploration, development and operations and environmental consulting and remediation services.

Alexco Resource Corp.'s business is to unlock value and manage risk at mature, closed or abandoned minesites through deployment of the company's core competencies and skills which include management of environmental services, execution of mine reclamation and closure operations and where appropriate, rejuvenation of exploration and development activity. The company's core asset is the Keno Hill Silver District, Yukon. The Keno Hill district is the second-largest historical silver producer in Canada and the historical production grades would rank Keno Hill in the top 3% by grade of today's global silver producers.

The Government of Yukon has recently issued a Quartz Mining Licence for the Bellekeno mine, being the primary permit authorizing Alexco to immediately commence mine development and mill construction at the site, located within the Keno Hill Silver District, Yukon. To take part in the start up, development and operation of the Bellekeno Mine and revitalization of the historic high grade Keno Hill Silver District, Alexco has an immediate opportunity for one:

Senior Engineer

Reporting to the Chief Engineer or designate, the Senior Engineer will be responsible for providing all engineering functions related to our underground mining operations including long range planning, budget generation/tracking, development and stope design, month end reconciliations, ground control, equipment utilization and functionality and ventilation/pumping design. As well, the successful candidate will be working closely with underground production and exploration Geologists to update the working model and aid in the design of exploration drilling programs. Additional duties may include closure planning studies, associated engineering and implementation.

Key qualifications include:

- Strong safety culture.
- Minimum of 5-10 years experience in Technical Services.
- Engineering degree or equivalent experience.
- Proficiency with AutoCAD. Promine/Amine/Minesite experience an asset.
- Experience supervising and working with a technical group.
- Strong organization and time management skills.
- Willingness to participate in Mine Rescue and Mine Rescue certified considered an asset.
- Light to heavy equipment operational skills considered an asset

Remuneration will be commensurate with work experience.

Alexco maintains camp facilities on Elsa, Yukon where employees and contractors are housed. This position is based in Elsa and the rotation schedule is 14 days on and 14 days off. Alexco provides full benefits packages comparable to current industry standards.
