

ALEXCO

Alexco Resource Corp. (the Company) is a Canadian corporation with corporate headquarters in Vancouver, British Columbia, Canada. Alexco operates two distinctive yet complimentary businesses; mine exploration, development and operations and environmental consulting and remediation services.

Alexco Resource Corp.'s business is to unlock value and manage risk at mature, closed or abandoned minesites through deployment of the Company's core competencies and skills which include management of environmental services, execution of mine reclamation and closure operations and where appropriate, rejuvenation of exploration and development activity. The company's core asset is the Keno Hill Silver District, Yukon. The Keno Hill district is the second-largest historical silver producer in Canada and the historical production grades would rank Keno Hill in the top 3% by grade of today's global silver producers.

The Government of Yukon has recently issued a Quartz Mining Licence for the Bellekeno mine, being the primary permit authorizing Alexco to immediately commence mine development and mill construction at the site, located within the Keno Hill Silver District, Yukon. To take part in the start up, development and operation of the Bellekeno Mine and revitalization of the historic high grade Keno Hill Silver District, Alexco has an immediate opportunity for one:

UNDERGROUND MINE SURVEYOR

Reporting to the Chief Mine Engineer or designate, the Mine Surveyor will be responsible for providing all survey functions related to our underground mining and surface operations.

Accountabilities

- Mine related duties include ramp and lateral development, production drives and underground infrastructure excavations
- Involvement in underground exploration drill hole markup/pickups
- Assisting Geologists with reserve updates
- Reconciliation of plans versus as-built excavations for contractor bonus calculations
- Updating of plans/sections, some stockpile surveys and short range mine planning.

Skills and Education

- Strong safety culture.
- Minimum of five (5) years experience surveying in an underground environment
- Post secondary education in surveying or mining related field preferred
- Proficiency with AutoCAD. Promine/Amine or Minesite experience an asset
- Strong organization, communication and time management skills
- Ability to work independently
